

## CATCH CARP SPAIN LAUNCHES IT'S NEW INTERACTIVE BOOKING FORM

Catch Carp Spain has just completed it's first full successful year here in Extremadura with plenty of the region's monster carp being caught on Catch Carp Spain rods, it really has been a great first year for us. We at Catch Carp Spain like to think of ourselves as a forward thinking carp angling company and are always striving to make things more enjoyable and affordable for our clients. With this in mind Catch Carp Spain is now pleased to be able to launch it's new interactive booking system. The thinking behind this is to give our clients as much choice as possible when choosing the kind of holiday they wish to have with us whilst also making the booking process easier. Catch Carp Spain has scrapped the commonly used existing system of set packages and time frames and will now be giving our clients the choice of many different options in an easy to use booking form that will allow each group, on our website, to tailor their holiday with us to their requirements and budget. This means that you the clients can go to the interactive booking form page and choose from the many options available until you get a package that suits you. The booking form will also individually as you select your options, calculate the price for each person in your group, and for people in the Euro zone there is also a handy currency converter available for your use. So please go ahead and have a look at all the fantastic new options available to you on the new options page, then go to the interactive booking page and build the best package to suit you.
